

F.R.A.S (Flame Resistant & Anti-Static) Certification

F.R.A.S polyurethane certification is a key requirement within bulk materials handling operations, particularly power station, coal, grain and sugar handling industries. When flame resistance and anti-static requirements are necessary within danger zones and where combustion risks are present.

Kinder polyurethane products incorporating the **Blue Polyurethane 83A F.R.A.S Certified** polymer additive possess a highly durable, longer lasting, wear and abrasion resistance characteristic.

The incorporation of F.R.A.S unique properties ensures polyurethane self-extinguishes and its formulation meets the electrical resistance requirements. Kinder Australia offers a range of polyurethane solutions with the **option of F.R.A.S** whilst conforming to all relevant Australian standards specified.

Detailed test and compliance reports available upon request.

Key Features

- Stringently tested to MDG3608, Section 3.3 requirements
- Certified compliant by NATA accredited NSW Govt Mine Safety Technology Centre
- High quality polyurethane guaranteed

Blue Polyurethane 83A F.R.A.S Certified Polyurethane option is available on selected conveyor componentry and material flow solutions:

Conveyor Skirting & Sealing Systems

[K-Snap-Loc[®] Dust Seal System](#)

[K-Fold-N-Seal Skirting System](#)

[K-Superskirt[®] Engineered Polyurethane](#)

[K-Containment[®] Seal](#)

[K-Super Block Skirting System](#)

Belt Cleaning Systems

[Super-G[®] Secondary Belt Cleaning System](#)

[XTC Secondary Reversing Secondary Belt Cleaning System](#)

Anti-Wear Liners

[K-Superline[®] Polyurethane](#)

[K-Redi-Liner[®] Polyurethane](#)

Case Study – Grain Industry

[K-Snap-Loc[®] Dust Seal System - Incorporating F.R.A.S](#)
