

Installation Instructions: K-Snap Action & Mercury Tilt Switches

Kinder Australia Product:	K-Snap Action & Mercury Tilt Switches
Product Category:	Materials Flow
Issue Date:	27/05/2013
Revision:	1

Overview:

The K-Snap Action Tilt Switches and Mercury Tilt Switches are used to indicate high bin level and/or control, as well as to detect plugged conveyor transfer point or chute, also to indicate crusher bowl level and/or control, and indicate conveyor belt drift and/or alarm. Boom and radial stackers height regulation is also been used for.

Procedure:

STEP 1: Locate positions where the switches need to be installed.

STEP 2: Hang the switch as per detail drawings or recommended diagrams.

STEP 3: Connect all wiring to control units, and check the function of the switch.
