

K-Dust Enclosure Components

K-Dust Enclosure Components are a natural rubber dust sealing cover, used primarily for machinery dust enclosures. The associated rubber moulding which fixes the cloth allows for easy removal for maintenance and inspection purposes.

A loading or discharge chute from a vibrating screen or feeder, conveyor cover or any other dust creating machine can be enclosed using this system.

K-Dust Enclosure Components are made from Butyl rubber because its resistance to ageing caused by outside exposure.

The rubber will not deteriorate even when it is subjected to constant vibration.

Part No.	Description
K-DUST2-1400-20m	Rubber 2mm thick x 1400mm wide 20m roll
K-RUB-GRIP INSIDE	Grip corner inside groove 250mm angle
K-RUB-GRIP OUTSIDE	Grip corner outside groove 250mm angle
K-RUB-GRIP UNDERSIDE	Grip corner underside groove 250mm angle
K-RUB-GRIPSTRIP-20m	Grip strip straight 20m roll
