

'P' Series Secondary Belt Cleaner

For the removal of fine and sticky product from the conveyor belt at the point of discharge.

- Removes sticky and fine particles adhering to the conveyor belt after load discharge.
- Prevents the fine sticky material from building up on the return rollers and support structures.
- Assists with the provision of a clean and safe working environment.

Key Benefits

Best used in conjunction with a Razer Industries 'H' Series cleaner as part of a total cleaning system. The 'H' Series will remove 75% of course carryback thus preventing the overloading of the 'P' Series.

- Full stainless steel construction including Tungsten Carbide Tip Holder, Cushion Plates and Fasteners.

- Features the Razer Stainless Steel holder for the Tungsten Carbide cleaning tips as standard. Minimises tip failure due to corrosion/ erosion from product borne acids.
- Features the Razer Universal mounting bracket for ease of installation and minimum spares stocking requirements.

Application

- Use as an individual belt cleaner or as a component of a complete cleaning system.
- Is designed for use on single direction conveyors only.
