

## Skirting Rubber

**Skirting rubber** is a multi- purpose rubber used as a sealing solution for all conveyor applications. Available in full width slabs up to 1500mm wide, and also in pre-cut skirting strips, making it suitable for all belt widths and trough angles.

Skirting rubber is available in various rubber compounds, thicknesses and widths in standard 30m rolls. It can also be supplied in shorter lengths or cut down to size, depending on the size of the belt.

Skirting rubber must be adjusted periodically, in order to make an effective seal that will prevent dust leakage and material spillage.
