

V-Plow – Tertiary Belt Cleaning System

Keep rocks, fines, clumps and other debris off your conveyor belt and away from your tail pulley with the V-Max Tertiary Belt Cleaning System.

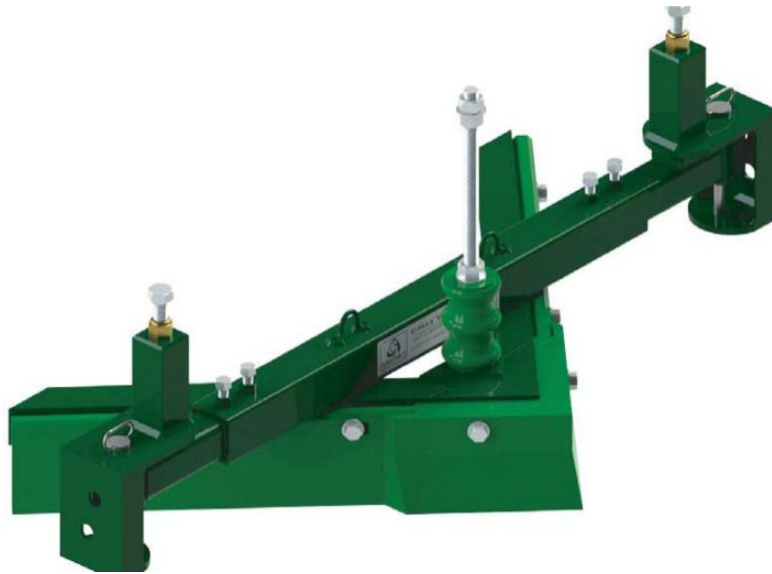

These plows are equipped with engineered urethane side blades together with an angled front nose plow.

With its spring tensioning, the V-Max Tertiary Belt Cleaning System is suitable for extremely dirty environments with heavy vibration. The V-Max clears debris while floating on the belt and will self-adjust as it wears.

Designed with a 6mm thick, 63.5mm x 63.5mm tube stock steel mainframe and anti-seize, urethane-lined stub ends for durability and chatter-free operation.

Key Benefits:

- Equipped with Kryptane® G83 polyurethane blades that are easily replaceable and provide 76mm of wear before needing service.
- Rugged mainframe and heavy duty front nose plow blade.
- Adjustable die spring tensioners to keep the plow on your conveyor belt during heavy vibration.
- V-Max systems 813mm and larger come standard with safety chains and nose tensioner.
- Wear travel limit mounting brackets.
- Weld- or bolt-in installation.

V-Max with standard safety chains and nose tensioner
