

EXPERIENCE INNOVATION PRODUCTIVITY

## Kinder Australia. Innovation is our Motivation.

Established in 1985, Kinder Australia is a leading supplier and manufacturer of practical solutions for conveyor and bulk materials handling equipment used in heavy process industries.

Our team of highly skilled field applications specialists and engineers are committed to providing innovative solutions to improve the efficiency of conveyor systems, helping to move bulk materials safely and effectively.

### Our Comprehensive Conveyor Product Range:

#### Belt Conveyor Components

Impact Load Zone Belt Support  
High Capacity/Speed Solutions  
Conveyor Skirting & Sealing  
Belt Cleaning System Products  
Conveyor Rollers, Idlers & Frames  
Conveyor Pulleys & Lagging  
Conveyor Belt Tracking

#### Safety & Environmental

Safety & Electrical Conveyor Tech.  
Conveyor Covers & Enclosures

#### Flow & Anti-Wear Products

Materials Flow Solutions  
Anti-Wear Liners  
Magnetic Wear, Repair & Seal

## Proactive Today. Productive Tomorrow.

We recognise the importance of being proactive and staying ahead. Especially in applications where operators are familiar with excessive dust, belt mistracking, material carryback and spillage - general challenges that continue to arise time and time again, contributing to downtime and sunken cost.

With a wide variety of engineered solutions, you can trust that our products will not only meet, but exceed your needs and ensure consistent and productive operations, tomorrow and beyond.

#### Increase & Improve

- Productivity
- Performance
- Material Retention
- Dust Containment
- Material Flow
- Site Safety

## Engineering Excellence.

Kinder Australia's engineering team comprises of experienced professionals specialising in conveyor and bulk materials handling. They excel in this field, ensuring end-to-end process efficiency, emphasising safety and productivity. Their global presence and industry network enables confident customer-centric solutions. With diverse engineering qualifications, they tackle complex challenges with precision. The team consists of experts in **mechanical**, **aeronautical**, **chemical**, and **electrical/electronic** engineering.

The engineers at Kinder Australia utilise advanced software, 3D printing, and strategic thinking for accurate component installation. They implement AutoCAD and SolidWorks to create 2D and 3D models, ensuring accurate installation of conveyor components and bulk materials handling accessories. By employing Simulation Finite Element Analysis, the team can predict and design innovative solutions by simulating real-world scenarios, optimising designs for productivity improvements.
