K-Conveyor Guard

Safer Conveyors. Smarter Protection.

K-Conveyor Guards **are designed to improve safety around conveyor systems by creating a strong physical barrier between personnel and moving equipment.** Built for demanding bulk materials handling environments, the modular guarding system helps reduce exposure to hazardous areas — including entrapment and pinch point risks — while maintaining practical access for inspections and maintenance.

IMPROVE SAFETY
Protect people and equipment

EASY ACCESS MAINTENANCE
Reduce downtime and improve efficiency

MEET COMPLIANCE
Support safe work practices and site requirements

BUILT FOR REAL-WORLD CONDITIONS
Tough, durable and reliable

Key Benefits

- **Heavy-Duty Construction / Protection** - Manufactured for harsh industrial conditions using durable steel construction and high-visibility safety finishes.
- **Fast Access Maintenance** - Smart modular design allows quick removal and reinstallation, reducing downtime during inspection and servicing.
- **Improved Conveyor Safety** - Helps reduce entrapment risks by restricting access around conveyor nip points, rotating components, and moving conveyor equipment.
- **Engineered for Compliance** - Designed to support safer work practices and align with site guarding requirements.
- **Customisable Configurations** - Available in multiple panel sizes, mounting options, and layouts to suit existing conveyor structures / layouts / applications.

Designed for Bulk Materials Handling.

- Mining operations.
- Quarrying & aggregates.
- Cement plants.
- Ports & terminals.
- Recycling facilities.
- Industrial processing plants.

High-visibility perforated panels (installed below or above the belt) improve airflow and visibility while maintaining protection.
